Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/518,783

Applicant(s)

YOSHIDA, NAOKI

Examiner

JIVKA RABOVIANSKI

Art Unit

2426

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 July 2010.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8, 10-19 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☐ Claim(s) _____ is/are allowed.
6) ☒ Claim(s) 1-8, 10-19 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO/SB/22)
4) ☐ Interview Summary (PTO-413)
5) ☐ Notice of Informal Patent Application
6) ☐ Other: _____
Paper No(s)/Mail Date _____

DETAILED ACTION

1. This Office Action is in response to an AMENDMENT entered July 02, 2010 for the patent application 10/518783 filed on 12/20/2004.

The Previous Office Action of 04/19/2010 is fully incorporated into this Final Office Action by reference.

The Office Actions of 03/26/2008, 12/10/2008, 06/02/2009 and 12/16/2009 are fully incorporated into this Office Action by reference.

Status of Claims

2. Claims 1 – 8 and 10 – 19 are pending.

Claim 9 is cancelled.

Claims 1, 4, 10, 11, 12, 13, 14, 15, 16, 17, 18 and 19 have been amended.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 – 8 and 10 - 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Holtz (USPN 6,760,916, referred to as Holtz).

Regarding claims 1 and 10:

Holtz anticipates first production means for producing a first content of a video signal and/or an audio signal (Holtz, C 6: L 53 – 60, C7, L 39 – 42);

Holtz anticipates second production means for producing a second content corresponding to the first content, the second content including a script for outputting a graphical user interface, and the script includes a description for causing a reception apparatus to execute (Holtz, C 7: L 42 – 47, C 43: L 57 – 59, C 8: L 60 – 67, C 41: L 36 – 54, Fig. 11; EN: production means for producing - “enhanced media”; content including script (e.g. with XML):

Holtz anticipates a process for producing use history information including a predetermined content in accordance with a use result related to the use by a user of the first content in the reception apparatus (Holtz, C 36: L 54 – 67, C50: L 23 – 26, C 44: L 6 – 9, C 36: L 54 – 67, C 46: L 23 – 25, C 46: L 30 – 32);

Holtz anticipates a process for changing the graphical user interface based on the use history information so as to change a service to be provided with an operation to a user interface screen picture (Holtz, Figs. 11, 12/1108a, C 44: L 6 – 8);

Holtz anticipates sending means for providing, as a broadcast, a transmission output of the second content in combination with the first content C 8: L23 – 41, C 35: 16 -24);

Holtz anticipates the style of the graphical user interface being adaptively varied by the reception apparatus according to the first content and a viewing history of the first content, the viewing history of the first content being stored in the reception apparatus (Holtz, Fig. 11 and C 8: L 35 – 41, C 42: L 59 – 61; C 41: L 48 – 49; C 13: L 19 – 31, C 32: L 7 – 31, C 32: L 36 - 38; EN: *a user profile* is automatically created from a cookie or similar identifier that is *deposited (stored)* on the enhanced *media client 120 operated by the user*; media index permits users to save content as they wish for later requests where the media index resides on an enhanced media client 120; enhanced media client 120 receives a customized *preprogrammed* show according to the user's profile (according to the first content and a viewing history); receive the most updated version of the new

stories; establish a *user profile* to specify the contents, duration and layout; the media streams can be modified according to the interests of the user of enhanced media client 120, reassembled and streamed in the new configuration);

Holtz anticipates the reception apparatus changes the graphical user interface relating to the first content in accordance with the second content (Holtz, C 43: L 14 – 29; EN: the receiver changes the GUI relating to the first content (Fig. 11/1102) in accordance with the second content (Fig. 11/1108a-1108b) which activates URL links (Fig. 11/1112).

Regarding claims 2 and 5:

Holtz teaches the transmission apparatus according, wherein the first content is compressed and coded, and transmitted (Holtz, see analysis of claim 1; C 25: L 60 - 67; C 26: L 1-10).

Regarding claims 3 and 6:

Holtz teaches the transmission apparatus wherein the second content is transmitted as data broadcast (Holtz, see analysis of claim 1 and C 14: L1 - 30).

Regarding claims 4, 14 and 15:

Holtz teaches reception means for receiving first content including a video signal and/or an audio signal transmitted as a broadcast and a second content corresponding to the first content, the second content including a script including a description for causing the reception apparatus to execute: (Holtz, C 7: L 66 – 67, C 8: L 1 – 12, C 11: L 45 – 56, C 7: L 42 – 47; EN: a second content - “enhanced media”; the second content including a script (e.g. with XML);

Holtz teaches a process for producing use history information including a predetermined content in accordance with a use result (e.g. selection of a hyperlink) related to the use by a user of the first content in the reception apparatus (Holtz, C 36: L 54 – 67, C 50: L 23 – 26, C 44: L 6-9 C 46: L 23 – 25, C 46: L 30 - 32);

Holtz teaches a process for changing the graphical user interface based on the use history information so as to change a service to be provided with an operation to a user interface screen picture (Holtz, Figs. 11, 12/ 1108a C 44 : L 6 – 8 C 8 : L 23 – 41, Figs. 11 and/or 12);

Holtz teaches user interface forming means for forming a graphical user interface to be output together with a picture as the first content in accordance with the script, for producing and storing the use result, and for

executing, in accordance with the script (Holtz, Fig. 11/ 1102 C 14: L19 – 31, C 13: L 21 - 31);

Holtz teaches the style of the graphical user interface being adaptively varied by the reception apparatus according to the first content and a viewing history of the first content, the viewing history of the first content being stored in the reception apparatus. (Holtz, Fig. 11 and C 8: L 35 – 41, C 42: L 59 – 61; C 41: L 48 – 49; C 13: L 19 – 31, C 32: L 7 – 31, C 32: L 36 - 38; EN: a user profile is automatically created from a cookie or similar identifier that is *deposited (stored)* on the enhanced media client 120 operated by the user; media index permits users to save content as they wish for later requests where the media index resides on an enhanced media client 120; media index permits users to save content as they wish for later requests where the media index resides on an enhanced media client 120; enhanced media client 120 receives a customized *preprogrammed* show according to the user's profile (according to the first content and a viewing history); receive the most updated version of the new stories; establish a *user profile* to specify the contents, duration and layout; the media streams can be modified according to the interests of the user of

enhanced media client 120, reassembled and streamed in the new configuration).

Holtz anticipates the reception apparatus changes the graphical user interface relating to the first content in accordance with the second content (Holtz, C 43: L 14 – 29; EN: the receiver changes the GUI relating to the first content (Fig. 11/1102) in accordance with the second content (Fig. 11/1108a-1108b) which activates URL links (Fig. 11/1112).

Regarding claim 7:

Holtz teaches the user is allowed to perform operations to the user interface picture (Holtz, C 39: L 50 – 55, C 50: L 23 – 26; EN: see analysis of claim 4).

Regarding claim 8, Holtz teaches a mark operation is performed on the selected one of the first content; and

Holtz teaches the graphical user interface changes in response to the mark operation (Holtz, C 34: L 40 – 61, EN: activating hyperlink).

Regarding claim 11:

Holtz teaches reception means for receiving first content including a video signal and/or an audio signal transmitted as a broadcast and a second content corresponding to the first content, the second content

including a script (e.g. with XML) including a description for causing the reception apparatus to execute: (Holtz, C 7: L 66 – 67, C 8: L 1 – 12, C 11: L 45 – 56, C 7: L 42 – 47; EN: a second content - “enhanced media”; the second content including a script (e.g. with XML);

Holtz teaches interface forming means for forming a graphical user interface to be output together with a picture as the first content in accordance with the script, for producing and storing the use result, and for executing, in accordance with the script, a process for changing the graphical user interface based on the use history information so as to change the service to be provided with the operation to the user interface screen picture (Holtz, Figs. 11, 12/ 1102, C 13: L 21 – 31, C 14: L 19 – 31, C 46: L 23 – 25, C 46: L 30 – 32; EN: see also analysis of claim 4);

Holtz teaches the style of the graphical user interface being adaptively varied by the reception apparatus according to the first content and a viewing history of the first content, the viewing history of the first content being stored in the reception apparatus. (Holtz, Fig. 11 and C 8: L 35 – 41, C 42: L 59 – 61; C 41: L 48 – 49; C 13: L 19 – 31, C 32: L 7 – 31, C 32: L 36 - 38; EN: a user profile is automatically created from a cookie or similar identifier that is *deposited (stored)* on the enhanced media client

120 operated by the user; media index permits users to save content as they wish for later requests where the media index resides on an enhanced media client 120; media index permits users to save content as they wish for later requests where the media index resides on an enhanced media client 120; enhanced media client 120 receives a customized *preprogrammed* show according to the user's profile (according to the first content and a viewing history); receive the most updated version of the new stories; establish a *user profile* to specify the contents, duration and layout; the media streams can be modified according to the interests of the user of enhanced media client 120, reassembled and streamed in the new configuration).

Holtz anticipates the reception apparatus changes the graphical user interface relating to the first content in accordance with the second content (Holtz, C 43: L 14 – 29; EN: the receiver changes the GUI relating to the first content (Fig. 11/1102) in accordance with the second content (Fig. 11/1108a-1108b) which activates URL links (Fig. 11/1112).

Regarding claims 13 and 16 - 19, see analysis of claims 1 and 4.

Response to Arguments

5. Applicant's arguments filed 07/02/2010 related to claims 1 – 8 and 10 – 19 have been fully considered but they are not persuasive.

In reference to Applicant's argument:

The cited references do not disclose the emphasized recitation. In particular, Applicant notes that the Examiner relies on Holtz's Figs. ii, 12; and column 44, lines 6-8 as disclosing ~changing the graphical user interface based on the use history information so as to change a service to be provided with an operation to a user interface screen picture." (Official action page 4, lines 3-6.) Regarding Holtz's Figs. ii, 12; and column 44, lines 6-8, Applicant notes that the portion merely discloses displaying ~an HTML page from a web site that is linked to the current media stream," and does not disclose that the reception device changes the graphical user interface, let alone that the reception device changes the graphical user interface in accordance with content which includes a script for outputting a graphical user interface (i.e., ~second content"). Accordingly, Applicant believes that claims i, 4, and 10-19 are patentable over the cited references - taken either individually or in combination - on at least this basis.

Examiner's Response:

The pointed out paragraph from the specification cites: "the digital satellite broadcast receiver according to the present embodiment controls to change the display content of the GUI screen picture relating to the video/audio content in accordance with the scripts of the GUI content ... changing the content of a content is varied in accordance with the user's behavior (actions) is also carried out, for example, in Web pages". Therefore, based on this information the receiver changes the GUI relating to the video/audio content (Fig. 11/1102) in accordance with the scripts of

the GUI content (Fig. 11/1108a-1108b) related to the URL links (Fig. 11/1112).

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Contact

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jivka Rabovianski whose telephone number is (571) 270-1845. The examiner can normally be reached on M-F 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JOSEPH HIRL can be reached on (571) 272-3685. Customer Service can be reached at (571) 272-2600. The fax number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
